

Portrait Photography Workshop Gear List

Below is a list of the gear many of you were interested in after the workshop. If there are any other items that I did not include on this list, please let me know so I can update it. I have no affiliation with Vistek, but they have a fairly comprehensive inventory of photographic equipment; their website is a great resource for getting at least an estimate of cost.

Item	Brand	Model	Price at Vistek.ca
Ten foot light stand ^a	SLS	SLS-LS10B	\$32.99 (Buy)
Three foot backlight stand ^b	SLS	SLS-LS3S	\$24.99 (Buy)
Universal Shoe Mount	Photoflex	PX125	\$34.99 (Buy)
45" Adjustable Umbrella ^c	Photoflex	PX230	\$57.95 (Buy)
Honl Speed Strap	Honl Photo	HP100	\$14.99 (Buy)
Honl 8" Speed Snoot ^d	Honl Photo	HP103	\$44.99 (Buy)
Medium White/Silver Reflector	Lastolite	3631	\$119.95 (Buy)
Large White/Silver Reflector	Lastolite	3731	\$159.95 (Buy)

Notes

^aThe universal shoe mount is required to attach a speedlight to this light stand.

^bThe three foot backlight stand is really useful if you take the feet of the bottom, and let an assistant hold the pole with the speedlight on top. Again, you will need a universal shoe mount to attach a speed light to this stand.

^cThe umbrella can be used as either a shoot-through or a reflective umbrella (very versatile).

^dThe Honl speed strap is required to attach the 8" Honl Speed Snoot.
